

# COMMIT TO COMPLIANCE

**"OSHA is here, and they want to know if critical to safety valves are being properly tested."**

When OSHA stops by, its typical fine amount is \$33,000. Sentinel Activity Monitoring provides the only means of on-going non-intrusive valve testing and automated documentation. This not only helps meet the required Inspection, Testing, and Maintenance of valves, but also provide peace of mind that the testing is complete, documented, and available at any time for reporting.

This low-voltage, non-intrusive solution is easily retrofitted to all common manufacturer's refrigerant valves.

**Commit to Compliance: Safeguarding Lives.**

Contact us for more information on Sentinel and our enterprise-wide accessible cloud-based dashboards and notifications.
